

'KWFLK' TAPPING CHUCK & 'KWES' SERIES TAP ADAPTORS

TYPE : KWFLK FOR CNC MACHINES

SIZE : 1, 2, 3 & 4

Application:

- To suit taps on mechanically and CNC machines, drilling machines, lathes, milling machines and machining centers.

Features:

- Very short design and low weight.
- Quick Change feature to suit KTA- Quick Change Adaptors with and without safety clutch.
- Length compensation to compensate difference in pitch between positive feed and the pitch of the tap.
- The chuck is equipped with an adjustable device to increase the cutting pressure to ensure positive start when tapping cycle commences.
- Chucks WFLK can be applied horizontal or vertical and are used for right or left hand threads.
